

Frame Hardware Color Options

DIY Retractable Awning frames, installation & support brackets and optional hoods are constructed of metal components that are professionally coated to offer products that look great while providing superior solar protection.

The **SC1000** framework features a painted enamel finish that is available in **White and Sand**.

The **SC4000** framework components have been pretreated before being powder coated. This unit is available in **White and Sand** hardware colors. This finish is warranted for 5 years.

The **SC5000** framework, like the SC4000 is pretreated before the powder coating is applied. The powder coated finish is available in **White, Sand, Ivory & Brown**. This durable finish is also warranted for 5 years - see actual warranty for details.
