

DIY SunCover Fabric Valance Options

The valance is located on the front of the awning which provides additional solar protection. The valance slides into a track on the front bar and measures 8 inches long. Depending on the model you select, you can choose from different valance cut styles and braid color options. You can also simply select "Best Match" and our seamstress will choose the best color match for the fabric you select.

Valance Style Options, Based on models:

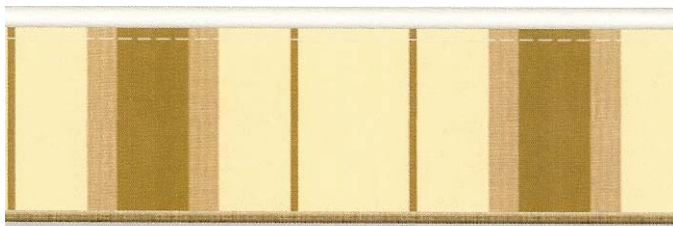

SunCover 1000/4000: Wave is your only valance cut option
